

BeeA'h Environmental Policy

BeeA'h is committed to the protection of environment locally and globally and recognizes the importance of incorporating environmental issues in to everyday business decisions and activities.

The company based on the evaluation of significant aspects of its activities conducted initially is aware of the potential risks which may arise from its operations, the most severe one being the emission to the air.

The personnel involved in the day to day operation of the plant will conduct themselves in an environmentally responsible manner at all times and aim for overall continual improvements of environmental performance.

The key elements of the company's environmental policy are:

- Operate the facility in full conformance with the requirements of ISO 14001.
- Promote environmental protection and minimize the environmental impacts associated with company's operation.
- Support safe disposal of hazardous wastes.
- Ensure compliance to applicable environmental legislation set out by local and international authorities.
- Safeguard the health and safety of BeeA'h employees while working at site.
- Provide environmental training to all employees to maximize the environmental protection and to convey the implication of environmental policy and Environmental management system.
- Respond positively to the concerns of all interested parties including the neighbours, local community and law enforcing authorities.
- Continual improvement of company's environmental performance and adoption of best available technology at all times.

The company will ensure that the environmental policy is understood by all employees and made available to the public at all times.

The top management support this policy and ensure that it is implemented at all levels. The environmental policy will be reviewed at regular intervals.
